SUMMARY

Computer Systems Analyst specializing in business systems analysis, workflow modeling, and ERP/SaaS integrations. Bachelor's in Computer Science and Management with IBM Systems Analyst certification and experience supporting high-volume transaction platforms.

EXPERIENCE

Systems Analyst

Clearpoint Systems

2023 - 2025, Remote

- Supported requirements elicitation and discovery sessions across ~10-15 client implementations, documenting business and system workflows across order intake, dispatch, service execution, and invoicing processes.
- Produced and maintained business and system requirements documentation, functional specifications, and system context diagrams used to support solution configuration and feature delivery across multiple release cycles.
- Assisted with current-state and future-state process modeling for client onboarding projects, identifying integration touchpoints between ERP (NetSuite, Business Central), CRM (Salesforce), and accounting export workflows across multiple client environments.
- Documented and maintained 200+ integration field mappings across client systems, including normalization rules for customer master data, service codes, and billing status alignment to support cross-system data consistency.
- Contributed to API and system integration documentation for 5-10 external system integrations, including payload structures, webhook behaviors, and common error handling scenarios used during implementation and testing.
- Performed data validation and solution verification using read-only SQL queries, UAT scenario libraries, and platform reporting tools to support testing, go-live readiness, and early production validation.

Web Administration and Development

The Web Advisors

2017 - 2018, Vernon, BC

- Implemented development fixes and custom WordPress functionality for BC tourism platforms using JavaScript plugins and Laravel-based web components.
- Migrated and deployed WordPress sites to cloud hosting environments, improving reliability and reducing hosting-related outages.

Web Developer

GoMax Solutions

2015 - 2017, Kelowna, BC

- Designed and developed custom WordPress themes and plugins supporting mortgage client intake workflows and business data capture.
- Implemented new hosting architecture and site rebuild initiatives that improved uptime and client site stability.
- Managed and maintained 50+ client websites including migrations, backups, and production issue resolution.

PROJECT

PMS Modernization Systems Analysis Case Study (Portfolio)

XYZ Health Solutions • www.alanamorin.com • November 2025 - December 2025

- Built a full systems analysis case study including workflow modeling, data modeling, and SQL analytics simulating scheduling, billing, and operational reporting for a legacy healthcare PMS environment.

EDUCATION

IBM Systems Analyst Professional Certificate

IBM & SkillUp • 2025

Bachelor of Integrated Studies, Computer Science and Management

University of Manitoba • 2023

- Graduated with Distinction

SKILLS

Systems Analysis: Business analysis, requirements gathering, use cases, workflow modeling, gap analysis, UAT validation

Data & Integration: SQL validation, data mapping, API documentation, cross-system data flows

Platforms & Tools: ERP/CRM integrations, SaaS workflow systems, Visio, IBM Cognos, Lucidchart, Postman, Jira, Confluence, SQL, Excel, Tableau, Power Bi,
